Market Updates

Wheat

Reduced wheat exports from the EU and Ukraine due to policies and weather are tightening the global wheat supply, pushing prices higher.

Whilst most of our flour supply is covered through to Autumn, we have seen this feed through to some price increases.

Cocoa

Cocoa reached historical highs again in December 2024 & has remained volatile due to continued stock tightness of cocoa beans and continued market concerns regarding crop & future supply.

Over the next few months, we are likely to see price increases from our chocolate suppliers as a result of this. We are also seeing this seep through into product pricing where cocoa is a component i.e. cake mixes & frostings.
